## Don't Get Caught!

### Best Practices for Billing and Documentation (ETHICS)

With Paula Hartman-Stein, PhD

Medicare and third party payment regulations change rapidly, catching some by surprise while prepayment audits for mental health services and reviews for documenting medical necessity are on the rise. Although it is true insurance fraud is not common, many providers fail private insurance and Medicare probes because they unwittingly commit "waste and abuse" due to lack of knowledge about the latest requirements for proper documentation and coding.

**Coding and billing procedures for psychological testing will change in January 2019. This practical seminar will cover up-to-date ethical and best practices for coding and documenting mental health services for both Medicare and other third party payers.**
