A team of 3 faculty alongside 8 graduate students from Cleveland State University have joined us today to help in establishing and enhancing Counselling and Psychology programme at KCA University.

The group joins Prof. Karthryn MacCluskie who is on sabbatical leave from Cleveland State University but has chosen to be at KCA University for one semester. Prof. MacCluskie is a distinguished Professor of Counselling and Psychology who has written widely in the US on counseling psychology, crisis management and school counselling. The team will be at the university for a period of two weeks.

During this time, they will be running a workshop for teachers from selected Kenyan schools. Teachers will undergo training of the trainer (ToT) on school counselling including crisis management in schools between 13th and 14th February 2018 at KCA University Main Campus Ruaraka. The workshop is open to the public. This training is more appropriate now given the challenges the country has faced in public schools including school infernos.

Contact Judy on 0721531885 or Prescilla 0722441396 for more information on the workshop.
