Enrollment Instructions

All candidates should enroll in the appropriate new program template as listed above, even if you have previously submitted work in a different template.

To add the new template, go to your Taskstream home screen (<http://login.taskstream.com>). Scroll to the lower right corner of the screen and click the “Enter Code” button. Enter the code as listed above.

The new templates have fewer requirements than the old templates. For any requirements listed in the new template that you have completed in your old template, click on that requirement, add a “text/image” box and write “I submitted this in my old template.” Submit the requirement to “Manager, Cleveland State” to receive credit for the assignment.
